

# PROXIMITY LAWS

(32B-1-202) Proximity to community location.

For many years, Utah has had laws that prohibited businesses who serve alcohol from being located too close to a "Community location". A community location is defined as:

- (a) a public or private school
- (b) a church
- (c) a public library
- (d) a public playground
- (e) a public park

There are also two types of proximity requirements depending on which type of license is in proximity. A bar, for instance, has to be further away than a restaurant.

1. The Commission cannot issue a license to any of the following license types:

Banquet Catering  
Bar  
Beer Recreational  
Hotel

Package Agency  
Reception Center  
Resort  
State Store

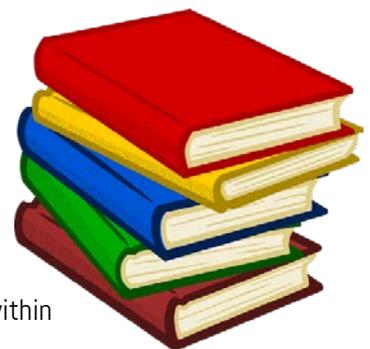

## IF:

The business location is within **600 feet** (ordinary pedestrian travel) or within **200 feet** of the community location (when measured in a straight line). Measurements must be made from the nearest patron entrance of the business to the nearest property boundary of the community location.

2. The same requirements apply to:

Airport Lounge  
Full Restaurant

Limited Restaurant  
Beer Only Restaurant

**EXCEPT**, the business location must be only within **300 feet** of ordinary pedestrian travel.
